

SOP
FOR OBTAINING OF ELECTRICITY CONNECTION
FOR ALL PIEDMC PROJECTS

Electrical Department
Dated: September 16, 2015

PIEDMC has developed Industrial Estates all over Punjab; at one time different estates remain on different stages of their construction. Concurrent activities demand simultaneous actions. Electricity being the most important element of developmental process needs to be obtained from respective DISCO's in different modes and loads. Stage wise demand of electric load is as follows:

Stage I

Initially PIEDMC will apply for 300 or 500 KW electricity connection (as per requirement) for site office as a basic functioning need.

Stage II

PIEDMC will apply for 5 MW or 2 x 5 MW (as per requirement) electricity connection with the dedicated line from nearest grid station.

Stage III

PIEDMC will apply for approval of ultimate load (as per yearly plan) and for the construction of grid station form related DISCO concerned by submitted following:-

- ◆ Load flow study/ Feasibility.
- ◆ Soil Investigation Report
- ◆ Application for Load Sanctioning and Permission of Grid Station Construction.
